

WELCOME TO DIGITAL DENTURES

FEATURING DIGITAL DENTURES
MANUFACTURED ON A CARBON 3D PRINTER
USING DENTCA AND LUCITONE MATERIAL.

1

PRECISE FIT

CAD/CAM technology is extremely accurate and eliminates human error to achieve a better fit.

2

FEWER APPOINTMENTS

Reduced clinical chair time.

3

QUICKER TURNAROUND

Fewer lab production days and quicker turnaround time.

4

ADVANCED CAD/ CAM TECHNOLOGY

Creates a digital backup of file.

By offering our customers advanced CAD/CAM technology for digital dentures, we are helping our dentists achieve faster, more accurate results, with reduced chair time and overall quicker case completion, resulting in fewer appointments and increased chair availability. Digital files of the dentures allow for an easily replaced denture in the event of loss or breakage.
